

- What do I want to learn or understand better?

As of now me and my group decided to develop our project and make it available as a website. Currently I don't have any experience developing for and working with websites, which could be problematic down the line. I would like to get familiar with how the whole "web development" process works and eventually learn how to write code in e.g. IntelliJ and have it communicate with or run on a website. In order to familiarize myself with this I have decided to study the subject by watching youtube videos explaining the process and try it for myself. There are also some students in my group who do have experience working with web development so I could perhaps ask them for help as well.

- How can I help someone else, or the entire team, to learn something new?

Not much has changed since last week for this question. However, I have gotten to know my group members more since then. Becoming more familiar / friendly with my group members will make communication easier, which for me makes it easier to help people with whatever they need help with. If there isn't much communication between the group then how would you know what someone needs help with?

- What is my contribution towards the team's use of Scrum?

We are still in a very early stage of our project, however I have taken some time to learn scrum better (which is still an ongoing project for me). The group was about to use Trello as our scrum board but then someone in the group suggested we use the built-in scrum board available in our github organization. I never knew github had that feature before so I quickly looked into it and created a scrum board for our group. Elias had the same idea so I think we both created a scrum board at the same time.

- What is my contribution towards the team's deliveries?

I have been present at all the lectures as well as all the group meetings we have had so far. As for everything else the group and I have worked an equal or close to equal amount to contribute to the deliveries of this week.
