

# Individual Reflection

André Kejovaara

Week 1

## **What can I do to learn or understand better?**

There is much room for improvements and new things to learn in this course. My main focus will be how to work well with Agile software development, to learn and understand the routines and how to work well as a team.

## **How can I help someone else, or the entire team, to learn something new?**

By trying to recognize that people have different skill sets and experiences and by understanding those it can enable you to help your team in an efficient manner when problems would arise.

## **What is my contribution towards the team's use of Scrum?**

I've attended lectures and the first workshop for Scrum during the first week to acquire some knowledge for what Scrum is and how to use it properly. This lets me be active in discussions in the team.

## **What is my contribution towards the team's deliveries?**

I've been active in discussions we've had during the week. Also been looking around for what kind of projects we might do. It's still early stage of the project.
